

## **Recruitment and Mentoring Committee**

### **Annual Report**

**October 3, 2008**

**The Recruitment and Mentoring Committee is finalizing it's web page and plan to have it completed by December 2008.**

**The web page will include a list of library school programs that are local, that have distance programs, or that have medical library programs. Each of these programs must have internship/practicum options. There will be contact information for the internship/practicum programs. There will also be a list of medical libraries in the PNC region that will accept interns/practicum students. Joan Truncali, a volunteer at OHSU and a former practicum student, gathered the information on the library schools and Nikki Dettmar will be developing a survey to get information about libraries in the region who accept intern/practicum students. This way libraries that want practicum students will have that information available, and can also contact library schools that have practicum/internship programs. Once the page is up, we will send notices to the library schools notifying them of the information, so that they will be able to use it with their students.**
